

Introduction

This wireless phone is designed to relieve users from the inconvenience of sticking by the phone and computer when making a VoIP call. By using the cutting-edge echo cancellation and noise reduction technology, it performs perfectly with crystal clear voice quality. As it is seamlessly integrated with Skype, just plug it into the USB port of your PC, you can take the handset away and talk to your Skype friends wirelessly up to 50 meters indoor and 250 meters outdoor. No doubt it would be your best choice for VoIP telephony.
